I am a full time Class A truck driver, hauling Fuel across Souther California. Also, I am a mostly self taught Python Programmer, and self taught Swift Programming language. I recently joined an Online Coding bootcamp at Tripel Ten, to be able to master Python Programming and Data Science.

SKILLS

- Python Programming Language
- SQL (Structured query language)
- Swift Programming Language
- Jupyter Notebook
- Visual Studio Code
- Pycharm

LANGUAGES

- English and Spanish | Native

EXPERIENCE

TRUCK DRIVER   Feb 2020 - Present

MJ Tank Lines | Bloomington Ca

Driver Trainer - Safely and efficiently deliver different types of Fuel all across Souther California.

Train new drivers to deliver fuel types to different customers safely and efficiently.

EDUCATION

DATA SCIENCE   2024 - Present

Triple Ten Online Coding Bootcamp

I have learned the necessary skills in this coding bootcamp to analyze different types of Data using different programming languages like Python and SQL. Mastered using Jupyter Notebook. Created Different types of machine learning algorithms.

Also, I have learned to use Swift Programming Language to create IOS compatible mobile applications.

PROJECTS

MJ Tank Lines App -

I created a mobile iphone app for my current employer to be able to do day to day tasks through a mobile application, making the job easier and more effective.

https://github.com/montesalan26 -

Created Numerous Python projects using Jupyter Notebook, from creating different machine learning models using Python.

Analyzed Numerous CSV files, creating graphs, analyzing patterns and predicting outcomes using different machine learning models for example: Linear Regression Models, Decision Tree Regression/Classifications, Random Forest Regression.
